

**Interim Technical Guidance with Respect to Format and Content of Project Signs  
at Construction Sites**

**within the NFECSW AOR, including Southwest Region, EFA West and EFA  
Northwest**

**29 March 2004**

NAVFAC has adopted new logo and banner designs under the recently published Communications Program. Previously, we have been using the Project Sign Sketches attached to UFGS Specifications Section 01580N for format and content of Project Signs, including the "round" Southwest Division Seal in the upper right hand corner of the Project Signs. We must now change our Project Sign format and content to match the NAVFAC Communications Plan.

All new Construction Project Signs provided under the requirements of Section 01580N of the Specifications shall be in the format and of the construction shown in the attached sketches:

**[01580N ConstructionSigns.pdf](#)**

The URL for access to NAVFAC Communications Program Logo, Banner Design and Color Control is listed on the attached sketches. The URL, for convenience, may also be accessed by using this link:

**[https://portal.navfac.navy.mil/portal/page?\\_pageid=34,35749,34\\_35755&\\_dad=ptl&\\_schema=PTLP](https://portal.navfac.navy.mil/portal/page?_pageid=34,35749,34_35755&_dad=ptl&_schema=PTLP)**

Existing project signs using the format and content guidance previously included in Specifications Section 01580N need not be changed if already in place or in production. However, all new project signs shall comply with this Interim Technical Guidance.
